ALTIUM CAREFREE SERVICE PACKAGE

The Crucial Role of Training, Onboarding & Altium Care

In the dynamic realm of PCB layout and design, an *Altium Designer license isn't just a tool – it's a strategic investment in the future of your PCB design business*. It's also a move to enable your organization to excel in its core competency and meet your company's time-to-market goals. To realize the full potential of this cutting-edge software, it is essential to complement the license with additional services such as training, onboarding and ongoing support that seamlessly align the software with your team's skills and operational needs.

By combining the software with our trainings, onboarding and Altium care services, you are not just buying a tool – you are unlocking a comprehensive solution that will drive your company to PCB design excellence.

■ Training for Proficiency

Investing in training not only ensures that all essential elements are covered, but also minimizes the opportunity costs associated with extended self-study.

■ Onboarding for Seamless Integration

Our onboarding service guarantees a defined outcome of the setup process, a defined time-frame and a defined cost.

■ Care Package for Ongoing Support

Our comprehensive care service goes beyond resolving license issues and error messages, so you can focus on what you do best: Bringing electronic designs to life.

Training for Proficiency

Investing in Altium Designer isn't just about acquiring a tool; it's about equipping your team with the knowledge to use it effectively. Our customized training programs ensure that your team can get the most out of the software. By providing the necessary skills and insights, we enable your team to navigate Altium Designer with confidence, resulting in increased productivity and innovation.

Onboarding for Seamless Integration

Every organisation has unique processes, workflows, and requirements. Our onboarding service goes beyond a generic setup and tailors the Altium Designer environment to your specific needs. This personalized approach ensures that the software integrates seamlessly into your environment, optimizing efficiency and minimizing disruption. We understand that a well-aligned software environment is essential for a smooth transition and maximum benefit.

Care Package for Ongoing Support

Your journey with Altium Designer doesn't end after setup and training; it's an ongoing process of growth and adaptation. Our Altium Care Service enables you to address any questions or challenges you may encounter, whether in using the software environment or with design questions. This direct line to expert assistance ensures that you can easily navigate the intricacies of Altium Designer and PCB layout, fostering a continuous learning environment and minimizing the time required to find the optimal solution.

Alignment of People, Processes & Software

Success in PCB layout is not just about having a powerful tool; it's about aligning your people, processes, and software. When seamlessly integrated into your organization, Altium Designer becomes a catalyst for innovation and efficiency. Our value-added services are designed to bridge the gap between technology and application, enabling efficient PCB layout and design.

**Purchasing a license of Altium Designer is not just a transaction.
It's an investment in the future of your PCB design business!**
